

Servo Motor screen printing machine by vacuum

- The vacuum screen printer can fix the material without displacement.
- This Flat surface screen printing machine has intimate anti-pinch device to protect users from injury.
- This semi automatic screen printer adopts servo motor design. Using precise servo motor, ball screw and linear guide for ink scraping, movement stable, printing more accurate.
- It's different with pneumatic cylinder type screen printer, will not generate ink leaking problem which affected by the air pressure and the left and right anti-collision buffers.
- This suction screen printer adpots 7.0 inches multicolor color touch screen ;The man-machine interface can be easily switched to select the language:English, Indonesian, Vietnamese ,Thai andTraditional Chinese.
- Abnormal warning display, convenient for quickly eliminate abnormalities
- Able to set the number of times which silk screen is used, and it will automatically stop and display inform when the number is arrives.
- PLC Programmable Logic Controller easy to add and modify function
- Servo ink Scraping System provide the entire scraping process able to control within a fine tolerance.
- Silk screen printing stencil frame holder left-right moving by linear guide, smoothness and more precision than T-track.
- Precise CNC machining assembly bushing up-down system attain high precision, easy to move up and down, stable and quiet.
- More convenience to clean the silk screen
- Flat screen printing machine adopts a magnetic squeegee clip (Patent No. M390871) makes the squeegee position can be slided easily and is simple to adjust and disassemble.

3 years warranty
