

Two-Color Ink Cup Pad Printing Machine

FC-192ASC-2-Color Tagless Label Printing Machine (Pad Printer with Pad Slide Mechanism)

- Exclusive special design: the 2 sets of printing pads on the pad printer have a center distance of 200mm. This ensures that the printed object remains completely centered and immobile, even for large objects.
- During printing, the printing pad move while the jig remains stationary, resulting in more precise color registration and alignment. This allows for easier operation.
- When printing larger objects such as clothing labels or logo, positioning can be challenging. However, with this special design, you simply need to press and hold the object without moving it, and the machine will automatically complete the dual-color printing process.
- Dual-seat adjustable steel plate holder is adjustable in the front, back, left, and right directions.
- This pad printing machine can be equipped with a cross red light laser pointer, which allows for convenient and fast positioning of printing based on the reference cross red light projection.
- The new generation of lightweight sliding sleeves, paired with composite bearing seats, offers fast, stable, and accurate performance.
- It improves stability, sealing, and precision to achieve optimal performance.
- The pad printing machine is equipped with a 7" HMI and a PLC, providing excellent visual effects, easy operation, and more user-friendly.
- The HMI allows for easy switching of languages, offering options such as Traditional Chinese, English, Indonesian, Vietnamese, and Thai.
- The number of prints can be set. The machine will automatically stop and display a prompt when the set number is reached.

Model	Color	Machine Size (cm)	Capacity / hr	Suitable Cliché Size	Net W.
FC-192ASC	2	L:70 W:78 H:140 cm	800~1500 pcs	120X240 mm	135KG

Fine Cause manufactures pad printer and screen printer including standard types and customization. We manufacture a variety of ink cup pad printer, open-tray pad printer, servo motor screen printer, pneumatic cylinder screen printer and customized screen printer.

In the past decade, we have taken part in an extent of customized and precise machinery projects on both pad printing and screen printing including a variety of application fields: printer for plastics, printer for metals, printer for glass, plastic surface printer, metal surface printer, glass surface printer, coin printer, auto-cylindrical bottle printer, SD card printer, MICRO SD card printer, contact lens printer, syringe printer, test tube printer, solder paste printer and touch glass printer, etc.

Our service

- ▶ Pad Printer
- ▶ Screen Printer
- ▶ Hot Stamping Machine
- ▶ Other Equipments
- ▶ Printing Supplies
- ▶ Inks/Solvents/Additives
- ▶ Printing Pad Catalog
- ▶ OEM Service Related
